Tianjin University Design Institute, Tianjin, China

Project Cost

RM 160 million

Completion Date

Expected completion

February 1998

Qingdao Commercial Complex, Qingdao, China

The project consists of 5 levels of basement car park, 11 storey podium shopping complex and 41 storey office building. The total built-up is 122,000 sq.m. The building is of reinforced concrete construction. Perimeter frame and central lift cores of the tower are designed to resist high seismic loads. The foundation of the structure is a thick reinforced concrete raft.
